1. SOFT SKILL DEVELOPMENT

Soft Skill Holistic Development workshop

It is a course that elucidates the critical role of soft skills in personal and professional success. The goal of this session is to promote active communication and describe various leadership styles in order to achieve organizational objectives. This course teaches students how to build effective interpersonal relationships with others, the importance of active listening and body language in communication, how to tone one's voice in verbal and written communication, how to identify appropriate personal and professional values for nursing practices, and how to describe potential sources of stress and stress management strategies and development skills in preparation and PowerPoint.

The education system and teaching methodology should be modified and changed into skill-based learning, so that the students of today, can smartly overcome the challenges of the 21st century and occupy a strong position in their workplace

4. ANALYTICAL SKILL DEVELOPMENT

ICT tools for students in higher education

ICT stands for information and communication technologies and is defined, as a “diverse set of technological tools and resources used to communicate, and to create, disseminate, store, and manage information.” To reach the goal of preparing teachers for effective technology use, a well-designed professional development program is essential. Professional development in a technological age requires new definitions and new resources. The use of technology enables teachers to implement new teaching techniques, to help students work collaboratively and develop higher-order thinking skills, to encourage students to be engaged in the learning process, to assist students who have various learning styles and special needs, and to expose students to a broad range of information and experts. ICT is making it increasingly easy for teachers and students to have access to a broader range of materials than they can use in the classroom.

To reach the goal of preparing teachers for effective technology use, a well-designed professional development program is essential. ICT can not only improve learning; but can also break down teacher and student stereotypes and boost self-esteem and would revolutionize the higher education system

Research Methodology workshop

The course aims at developing the scientific attitude from the very beginning i.e. from under graduate level, so that it will formulate base building strong foundation of research. It will enable the undergraduate student to apply the most appropriate methodology for their research studies. The course is structured in a way that it will clarify the theoretical concepts as well as student will learn the practical aspects. This course will concretize the fundamental concepts and analytic methods. It will include topics spanning from introduction to manuscript writing. Hands on training on data analysis will fully equip them to carry out quality research.

DIRECTOR PRINCIPAL
SURENDRA DENTAL COLLEGE
& RESEARCH INSTITUTE
SRI GANGANAGAR (RAJ)

Data Analysis using SPSS

Hands on training for faculties, researchers, PG students and supporting scholars in diverse health care research and academic fields to produce high-quality dissertations and theses. Use of latest version 24.0 SPSS for data analyses from 2017 and hands on training made a difference in applications of SPSS for improving the quality of research.

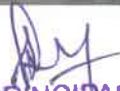

Talk on Plagiarism

Academic Integrity is the foundation on which all of academia stands. Increased incidence of compromised publication ethics and deteriorating academic integrity is a growing problem contaminating all domains of research. It is important to ensure prevention of academic misconduct including plagiarism in academic writing among student, faculty, researcher and staff. Responsible conduct of research and safeguarding ethics and academic integrity in scientific research is extremely crucial.

DIRECTOR PRINCIPAL
SURENDRA DENTAL COLLEGE
& RESEARCH INSTITUTE
SRI GANGANAGAR (RAJ)

University Grants Commission (UGC), mandated to coordinate and determine the standards of higher education, recently laid down UGC (Promotion of Academic Integrity and Prevention of Plagiarism in Higher Educational Institutions) Regulations, 2018 which provides for guidelines related to levels of plagiarism and academic integrity. Therefore, knowledge about the above aspects becomes essential for the academic fraternity

Gender Sensitization

Gender of a person and attitude of people towards gender have very high impact on personal and social health. Gender discrimination, female feticide, sexual harassment and abuse are results of unhealthy gender attitude.

This develops unknowingly because of peculiar sexual socialization. Only information about reproductive system will not be able to change this attitude as It involves de-learning and re-learning. There is need for proactive efforts to develop healthy gender attitude. This course is introduced to deal with these issues and will help to find solutions; This course is in addition to inclusion of gender sensitization in curriculum

Road Safety and traffic rules

This course will enable students to measure the magnitude and impact of road traffic injuries, assess the key risk factors, Strengthen the evidence base for prevention, implement promising interventions, deliver post-crash care and transfer techniques and Formulate and implement road safety policies.

Emotional intelligence

Happiness is described as the ability to detect and recognize people through heightened emotional intelligence (EQ/EI). Self-awareness, self-management, social awareness, and relationship management are all part of it. Although intelligence quotient (IQ) is linked to scholastic performance, it does not always guarantee personal or professional success. EQ, on the other hand, is a critical component of personal and professional development. While IQ is innate, EQ can be enhanced by studying self-management and self-awareness skills. This course is currently aimed to help students/participants live a happy and meaningful life by utilizing EQ/EI tactics.

WEBINAR-ETHICS IN DENTISTRY

A webinar was organized by the Grievance redressal committee on 9th June 2021 for all the students and faculty of Surendera Dental College & Research Institute. The speaker of the webinar was **Dr Vikram Pal Aggarwal**.

It was for one hour during which the attendees were made aware of the ethical principles to be used in Dental Research. The speaker emphasized on the importance of the title chosen for the study and the sample calculation for the same. The attendees also learnt about the step by step procedure for registry of clinical trials in Indian Council of Medical Research.

More than 100 participants attended the webinar and learnt about the Ethics of Dental Research. Dr. EenalBhambri, incharge, Grievance redressal committee ended the meeting with a vote of thanks and presented the certificate of appreciation to Dr. Vikram for his informative presentation.

Mentorship Programs

Mentorship programs are designed with an aim of providing, are liable and comprehensive support system, to motivate students to excel in both academic and non-academic fields and to make the most of their life at the college. The objectives of the program include:

To help the first-year students understand the challenges and opportunities present in the college and develop a smooth transition to campus life.

To counsel academically weak undergraduate students and to play an important role in helping troubled students cope with academic, extra-academic and personal problems.

To proactively try to identify problems of the general student populace and to bring them to the notice of the concerned authorities

Importance of team building

When team building exercises are implemented, employees build trust and a spirit of unity. They get engaged with each other and with their work. Employees feel more comfortable expressing concerns and needs, which leads to more effective communication. Team building can help your workforce get on the same page, work together, and increase their motivation to complete tasks in a timely manner. In other words, productivity can rise. And, exercises in team building support a strong company culture. Regular efforts that engage employees with company goals, values, and standards of performance can not only establish a wholesome culture, but also maintain it. Dr. Ruhi Sethi delivered a lecture on this topic.

Appropriate use of media and e- journals

Many of us now use social media to communicate, stay in touch and feel part often online community. For most people, joining in is trouble-free and fun but it can be easy to blur the lines between your personal voice and your role as regarding professional. Regardless of the accomplishments of social media one cannot simply turn a blind eye to the various problems that come along with it. While social media can be used in ways that promote positive and productive ideas in society, the negative outcomes from social media such as cyber bullying and other online dangers also pose a massive threat. Positive behaviours and aspects make social media an invaluable tool for young people if used appropriately. Mr.Tarun Nagpal was the speaker for this event. Total 30 delegates were registered for this seminar

Cyber security: Future Ahead with cutting edge technology

With the advent of everything online, more and more people face malware and viruses. In 2020, people were getting hacked on a daily basis. 2021 is seen to be worse. Data breaches have caused many a great deal of grief. Quantifying the cost of fraudulent attacks is difficult. However, the safest way to prevent these is by making use of cutting-edge cyber security which are easy to use and deploys solutions effectively. Its importance is to be realized in the near future, which tells us why it is a major milestone with the growth of attacks online. Cyber security serves as a back of our data as it can be accessed anywhere through the internet from anywhere

Mr. Asha Raju and Mr. Ruchir Verma were the speakers. Total 72 students were registered for this seminar.

To reach the goal of preparing people who have to work and save data online, this webinar focused mainly on for effective technology use.

AIRWAY MANAGEMENT COURSE

Airway management includes a set of manoeuvres and medical procedures performed to prevent and relieve airway obstruction. This ensures an open pathway for gas exchange between a patient's lungs and the atmosphere. This is accomplished by either clearing a previously obstructed airway; or by preventing airway obstruction in cases such as anaphylaxis, the bounded patient, or medical sedation. Airway obstruction can be caused by the tongue, foreign objects, the tissues of the airway itself, and bodily fluids such as blood and gastric contents.

WORLD DAY FOR HEALTH AND SAFETY AT WORK

Impact of covid on financial market in India

COVID-19 has brought massive disruptions to global markets. In India, severe financial impact has kicked in, due to under-developed public health infrastructure. Most of the brunt is being shouldered by the country's citizens which has led to crash in GDP, increased unemployment rates and crumbling health infrastructures. While this happens to be seen on a broader scale, an individual's financial goals are also affected. Both individual and the country together are facing a financial let-down. The cost of living has become higher which automatically affect our savings and investment, tremendous hike in life and medical insurance premiums and not to mention a lot to professional/ career goals. Mr. C. K. Arivazhagan conducted a webinar on this topic. Total 80 students were registered for this seminar. This financial loss period demands for a wise decision to take care of yourself and your loved ones. Investing in a better insurance is securing your present and your future. Lessening the personal COVID-19 financial impact has become more of a necessity than a choice which has to be inculcated in our lifestyles.
